SUTA Wage Reports

How to export from QuickBooks to Excel then import to Employer Portal

In QuickBooks, go to the top menu bar, then:

- > Reports
- > Employees & Payroll
- ➤ More Payroll Reports in Excel
- > Tax Form Worksheets

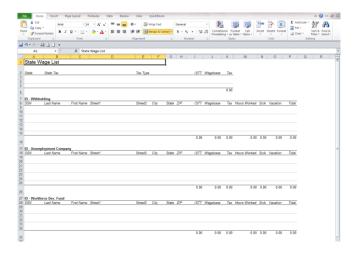

Excel will open. A new screen will pop up and ask "Which worksheet do you want to create?"

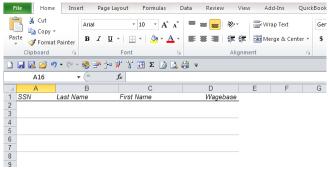

- ➤ Choose "State SUI Wage Listing"
- ➤ Choose "Last Quarter," or change the dates to the appropriate quarter
- Click "Create Report"

Data will export to Excel. The report will include ID-Withholding, ID-Unemployment Company, and ID-Workforce Dev. Fund, as shown below.

The only section needed for your SUTA report is ID-Unemployment Company. Highlight the other rows, including the total (rows 1-17 and 26-35 in the example above), right-click and choose "Delete." Next, highlight columns with extraneous information (columns D-I and K-P in the example above), right-click and choose "Delete."

Now you will need to add columns and proper information for Employer Account Number, Middle Initial (column needs to be there but data is not required), Quarter and Year to finish the wage list for importing. Please see the Import Wage Help for the correct file format. You can review the **Standard Template** or the **Tab or Comma separated** file (Client's EAN is not required unless you are a PEO).

Note: When you are done, choose to save the file in tab or comma separated format before importing.

Your report should look like the example below.
